GROWER

ALL-IN-ONE FARM MANAGEMENT TOOL

Take Operation Decisions to the Next Level

All-In-One Farm Management Tool

AGI Compass® Grower is the web-based farm management tool that provides increased visibility and control over every aspect of your business. It lets you capture real time farm data, allowing you to analyze and make more informed and efficient operation decisions.

WHAT AGI COMPASS CAN DO FOR YOU

- Crop Management Detailed record keeping for year-over-year crop variety, crop applications, harvest dates, yield tracking and selling price. Includes GIS/ GPS mapping, geo-tag key markers and crop observations.
- **Inventory & Contracts** Track product inventory and purchases. Monitor grain storage, shipments and contract management. Full traceability built in.
- **Operational Efficiencies** Equipment data integration, allowing for automatic transfer of electronic field records. Tracks soil testing for nutrient management and reporting.
- Profit Scenarios Extensive crop reporting by field and crop. Financial summaries including crop production costs, crop sharing, product summaries and more.

Extensive reporting is available at the click of a button, while the option to export **your** data at any time allows you even greater analysis options.
